CIFSS PRESIDENTS OF THE COUNCIL

There is no official list of all the Presidents of the CIFSS Council. The following information is gleaned from the minutes of the CIFSS Council meetings. Many times the meetings were called to order by the President, but his name was never mentioned. The Secretary of the CIFSS often ran the meetings in the absence of the President. The Presidency was initially rotated among the leagues alphabetically. Many times the President left in the middle of the year, thus you have multiple Presidents during a particular year. The President of the CIFSS Council was initially different than the President of the Executive Committee. The term of office often depended upon when the meetings were held which seemed to change each year. In the early history, years are often overlapped with different Presidents. Photographs of the Presidents began to appear in the “CIFSS Bulletin” in 1940, although not every year (these were the first photos of any type to appear in the “Bulletin”). The two year term of office started in 1972, with the election of the President from a list of nominees.
