

Wilson®

WHO'S GOT NXT?

Taking over as Official Ball of the CIF - Southern Section

TECHNOLOGY

Micro-Touch Cover

An extra layer of texture on the pebbled cover creates double-layered grip, and channels away moisture for ultimate control.

Extended Range Tech

An optimally balanced core generates maximum spin, making it easier to shoot from long range, so you can pull up from deeper than ever.

Composite Pebbled Channels

Composite channels are pebbled instead of smooth, creating a consistent texture over the entire surface of the ball for unparalleled control.
